1	5	In 1989 I receive a letter saying that the road was going to be re-laid. This never happened. What they did was the main street from Roos to the crossroad then the road from the crossroads to Hornsea and Burton Pidsea. They missed the stretch between and has still never been done. <i>(This is signed)</i>
2	9	In these austere times, when savings are paramount, I do not understand the mentality of those who wish to see more expenditure, on a plan which is less than six years old. Even the National Census is only conducted every 10 years. Come on Roos PC start saving money, not wasting it on unnecessary paperwork.
3	10	If any future development takes place in the village the parking facilities should be a priority. No parking on verges etc. We are trying to get extra parking on Eastfield Estate but to no avail as ERYC say no grass can be taken up.
4	14	Re: Question 4.2. I would like to add that we do find Roos quite a safe-area to live in!
5	46	<ol style="list-style-type: none"> 1. The bridge over the Roos Drain has been transformed with the addition of unnecessary large road signs + the road is far wider now than people envisaged. Much tighter controls are needed to protect our rural environment. 2. ERYC waste money on replacing plastic bollards which will obviously get skittled down again. The wooden ones are far better.
6	47	Empty houses should be compulsory purchase and then <u>sold</u> on to local family. Restrictions should be imposed on caravan parks or pay their way. Would like to see weight limits on the main road. Stop purchase of property for rent out.
7	48	<ul style="list-style-type: none"> • Want to retain village in terms of its rural tranquillity. Don't want to see extension of 'street lighting'. We really enjoy star light panorama we get here. • Love community aspects of village life = tradition • Love having two thriving & different public houses, the school, church, shops. Really lucky. We need to sustain these but don't want too much expansion.
8	53	4.3. Roads & traffic Parking outside school !!!!
9	56	Include in RES Fund Projects Extend street lighting in South Park to cover all South Park. Improve internet access by <ol style="list-style-type: none"> a) BT to supply village with fibre optic cable b) Set up satellite dish & feed community with access. (See project set up at Robin Hood's Bay)
10	59	Person 1 – If starter homes are built then these should not be bought to let. It defeats the object trying to be achieved.
Page 1 of 4		

11	61	<p>I would be keen to see more shelter belts and increased hedging to protect the village and its wildlife.</p> <p>Farmers should be discouraged from over-cutting hedges.</p> <p>Tree planting should be encouraged – the most recently planted kerbside & verge trees have not taken well due to their being badly planted. A more coherent approach is needed and would be better managed locally.</p>
12	81	<p>Would like to see North and South Ends joined by building houses along the main street this would also encourage traffic control. Introduce a 20mph speed limit but only <u>in front of the school</u> and only at specific times i.e. Mon – Fri 08-15 to 09-15, 12-00 to 13-00 and 15-15 to 16-15. (If that happens to be when the children are arriving/leaving the school)</p> <p>Outside of these limits keep the 30mph.</p>
13	86	<p>Qu.17 is misleading. If you live in a conservation Area there are no restrictions on replacing your windows from wood to plastic!</p> <p>However there are restrictions if you are a listed Building!</p>
14	88	<p>Economic Growth: With Localism not far away the parish needs to identify areas of economic growth, ideally in the hands of local people, businesses and the Local Authority.</p> <p>The parish has the ability to be sustainable , just look@ the local employment and output from local industry.</p> <p>Locally we can lead/direct our community into work, how – innovation – best use of community funds. I believe as councillors we have a duty to try a new approach to make our communities prosper – regeneration through a local approach letting our residents, local businesses, organisations into ‘driving seat’ to promote local growth. Community fund(start up packages) not individual in T’s & C’s @ moment, may be a way forward especially if linked to ‘renewable energy’ I have discussed the principle with Richard Evans at RES – he has not commented either way; only to confirm that regeneration is perhaps a way forward. Growth of our parish & it ticks government boxes. <i>(This is signed)</i></p>
15	91	<p>I would rather see the boundary extended than more housing within the boundary. This would prevent houses being too crowded and keep some space within existing buildings.</p>
16	92	<p>Any further building done in Roos should be done in a style that fits in with the village, with adequate space around each property to allow for parking/gardens. Maintaining the rural environment should be a priority – planting of trees/bulbs/hedges/using native plants/trees.</p> <p>Maintenance of the roads in Roos Parish area is also important. A lot of the roads, especially some of the smaller roads have poor surfaces, especially at North End, Tunstall & Hilston.</p> <p>It would be really nice to have some allotments in the village - I think it would add to the sense of community.</p> <p>I would like to see the Roos Parish Paths info extended to include local Bridleways. We have some good local businesses & I regularly use the shops, pub& motor mechanic. What I do dislike is the field full of wrecks at North End Garage - it’s an eyesore& probably a health hazard. How did the Parish Council ever let the proprietor get away with it?! Maintaining our church & Memorial Institute should be a priority of the Parish Council & I would support any initiatives related to this.</p>
17	100	<p>I feel that <u>all</u> planning applications should be decided upon their own merit not on where someone decided to draw a red line on a map or whether it’s a back garden, but judged upon the need for the individual requirements of the proposer.</p>
18	104	<p>Planning and development regulations need more frequent consideration and parishioners kept more informed of changes.</p>
		<p>Page 2 of 4</p>

19	108	As a resident of Hilston we are unable to receive any internet service through a BT line and the possibility of the line being upgraded in the near future seems very remote. We would appreciate any help in achieving some form of connection.
20	122	We pay <u>Roos</u> council tax for this parish why isn't <u>North End, Roos</u> considered in any of your future plans or are we all in this area "nonennaties". Don't we get a say in what we want in this area of Roos.
21	123	Getting high speed broadband would be very beneficial to our family.
22	131	18. What is the point of anything if the government can override any decision taken at parish or county level(e.g. wind turbines) 13. There is plenty of land available conveniently enveloped in the Conservation Area
23	134	<ol style="list-style-type: none"> 1. The provision of more young family housing is essential to maintain the school. 2. Provision of water supply to church and churchyard 3. Smooth safe surfacing of path from South End to churchyard.
24	141	<ol style="list-style-type: none"> 1. This is not Beechwood Views it is Pilmar Lane Nos 48-62 and wishes to remain so. 2. Why is this paddock part of the Conservation area? Surely a perfect site for starter homes. <i>(This includes a diagram/map and an arrow referring to the paddock on Rectory Road)</i>
25	142	I feel that a play area for older children would be a welcomed addition to the village, for example, a scooter park which when constructed would require minimal additional cost & supervision.
26	146	We have just moved to Roos and are keen to learn of the Parish Council initiatives and becoming members of the community. <i>(This is signed)</i>
27	149	<ol style="list-style-type: none"> 1. We feel very strongly about the imposed abuse of our village by the proposed 'industrial' wind turbines. 2. If funds are available from whatever source, the village community could benefit from the installation of water (mains supply) to our church. Besides the obvious benefits, a toilet could be installed. 3. At present we do not have a 'Village Green', a central place where one could meet, sit and communicate. Possibly the pinfold could be used, or perhaps a new area identified? 4. Broadband is painfully slow – a fibre optic cable would be superb! <i>(This is signed)</i>
28	160	<ol style="list-style-type: none"> 1. The internet is a major problem for my son's homework also it makes it impossible to work from home. BT have told us that "are far from the exchange" to achieve a fast & reliable service. 2. Although I am not against wind turbine development 'enough is enough' as the character of the village is been destroyed and soon we will be living in an industrial wind farm site as we will be surrounded on all sides.
29	176	<p>We live in a Conservation Area and are very concerned that residents are making changes e.g. new windows, satellite dishes, barns with double glazing units that do not agree with conservation rules. If people do not ask for permission it appears they can do what they like.</p> <p>Should there be a regular conservation review of the parish to ensure conservation policies are adhered to?</p> <p>This should at least be part of the village walk about by the parish councillors. The reason for conservation is to ensure the village retains its character but unfortunately many residents seem to disregard this.</p>
		Page 3 of 4

30	181	The low road from Tunstall to the main Roos to Withernsea Road seems inadequate especially since the entrance to Sand le Mere has been located there. Because the volume of traffic has increased the road is not wide enough and some of the bends are blind.
31	184	Question 18 refers to renewable energy but I think the parish should have an established position with respect to other forms of energy development. There is the possibility of gas cavern development at Owstwick. Rathlin Energy recently sent out flyers stating that they are going to carry out seismic tests for gas and oil in the area. I believe a stand needs to be made against such development because if we are not vigilant our rural setting will be destroyed and lost for future generations. Roos Parish alone has the influence – I suggest working closely with other parish councils – some form of confederation that can speak with a stronger voice
32	187	<ul style="list-style-type: none"> • 13a If the Questionnaire is for “All” Roos Parish, why does Hilston, Tunstall & Owstwick not appear as an option to “X”? This may mis-inform the outcome. • We would like the parish council to maintain its stance against installation of street lights. (For all 3 respondents)
33	193	LACK OF STREET LIGHTING – MAIN STREET Surely with 2012 fast approaching serious consideration should be given to obtaining adequate street lighting for the section of the B1242 passing through the village. It seems ludicrous that residents are still seen groping about in the pitch blackness some reliant on the light of a small torch. Thank goodness for the security /spotlights provided by the Post Office and the Roos Arms making passing motorists aware that village life does exist along this 30mph stretch of road. When I originally moved to Roos and queried the lack of lighting on what tantamount to the main east west road I was told by a neighbour lighting would spoil the view of the night sky. Need I say more! I trust the Emergency Planning Committee have emergency lighting equipment readily available should a serious emergency situation arise within the pitch blackness of Main Street.
34	194	Greater consultation and opportunity for public debate on village matters. Need for inclusion of matters like <ul style="list-style-type: none"> • Street lighting in Roos – need for more/no more? • RES Community Fund – plans for monies? How will they be distributed? • Parish Plan Committee- who/how are members elected to committee? • Q13a-What if Hilston is my preferred location for development? How can I express this on a plan for Roos only?
35	197	I think it would be a good idea to have an area on the website for ‘useful contact’ to include who to contact re the hiring of the Institute/playing fields Councillors numbers etc I think it would be good for residents to get a better broadband connection, should any turbine money need spending. I support the suggestion to buy a village marquee for future village events. I would really like to see allotments in the village and more tree planting.
36	203	<ul style="list-style-type: none"> - Poor condition of some pavements - Connection to Hull when bus pass can be used i.e after 9.30am.

Supplementary Question 13a Planning and Land Use.

No of Questionnaires returned 198 Number of respondents indicating preferred sites. 47

Comments written alongside the map are usually along the following lines:

If the Questionnaire is for "All" Roos Parish, why does Hilston, Tunstall & Owstwick not appear as an option to "X"? This may mis-inform the outcome. - What if Hilston is my preferred location for development? How can I express this on a plan for Roos only? - None at all.
